Objective

Artificial Intelligence and Data Science graduate with hands-on experience in machine learning, deep learning, computer vision, NLP, and full-stack development, seeking to contribute to data-driven and AI-powered solutions through strong analytical and programming skills.

Education

Miracle Educational Society Group of Institutions, Vizianagaram, Andhra Pradesh	2021 – 2025
Bachelor of Technology in Artificial Intelligence and Data Science	CGPA: 7.77
Sri Chaitanya Junior College, Vizianagaram, Andhra Pradesh	2019 – 2021
Board of Intermediate Education	Percentage: 84.8
Bhashyam E.M. High School, Vizianagaram, Andhra Pradesh	2018 – 2019
Board of Secondary Education (SSC)	CGPA: 9.5

Skills

Programming & Databases: Python, SQL
Data Analysis & Libraries: Pandas, NumPy, Scikit-learn
Visualization: Excel, Power BI (Learning), Matplotlib, Seaborn
Frameworks: TensorFlow, Keras, Flask, Django
Machine Learning & Deep Learning: Classification, Regression, Neural Networks, NLP
Version Control: Git, GitHub
Core Strengths: Analytical Thinking, Problem Solving, Business Research

Work Experience

Full Stack Programmer - SAK Informatics	September 2025 – Present
Location: Hyderabad,Telangana	
- Working on end-to-end development of internal tools and web applications using Python, Django, SQL, HTML/CSS. - Building and optimizing backend APIs to improve data flow efficiency and overall system performance. - Collaborating with the development team to debug, test, and deploy features across multiple modules. - Gaining hands-on experience in version control, server-side logic, and integrating frontend–backend components.	

Projects

AI-Powered Sentiment Analysis Bot	August 2025
Technologies: Python, Bi-LSTM, TensorFlow, GloVe, Flask	
- Preprocessed and cleaned large text datasets, applying NLP techniques such as tokenization, stopword removal, and embeddings to extract sentiment patterns. - Trained a Bi-LSTM model with GloVe embeddings, achieving 72% accuracy in sentiment classification across positive, negative, and neutral categories.	

- Deployed a Flask-based application with explainable predictions (Gemini API) and integrated positive news feeds (NewsAPI) for improved user experience.

Multi-Chronic Disease Detection Bot

December 2024 – March 2025

Technologies: Python, CNN, Random Forest, Flask

- Collected, cleaned, and augmented chest X-ray datasets to enhance model generalization and robustness.
- Combined CNN-based feature extraction with Random Forest classification, delivering **92%** accuracy in detecting multiple chronic diseases.
- Automated diagnostic workflows by generating PDF reports with embedded doctor recommendations (GoMaps API).

AI-Powered Chatbot for Academic Assistance

December 2024

Technologies: Python, Flask

- Designed a conversational assistant to resolve academic queries (Cohere API), reducing average response time by nearly **80%**.
- Built interactive features including randomized quizzes and a personalized study planner to support adaptive learning.
- Delivered a scalable Flask-based solution integrating query resolution, assessments, and study planning into one platform.

Certifications

- | | |
|--|--------------------------------|
| • Data Science , Dr. Reddy’s Foundation Tech Grow | May 2025 – August 2025 |
| • Python Full Stack Development , ExcelR | Jun 2024 – July 2024 |
| • Cloud Computing , Acmegrade | June 2023 – August 2023 |

Interests

- Exploring emerging technologies and staying updated on software development trends
- Collaborating across diverse fields to create meaningful, user-focused solutions
- Simplifying complex problems through thoughtful and data-driven approaches

(M. Bhargav Vijay)
